

PLD-3000

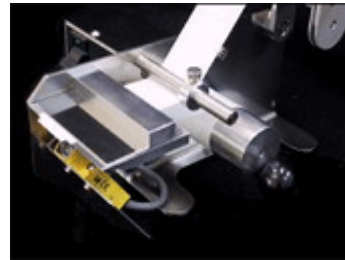

Label Dispenser designed
to reduce an electrostatic.

Yaesu

Feature

- This is the first ESD label dispenser in the world.
- By earthing the body and using ESD labels, we are able to reduce the static voltage to be less than 25 volts and for the body to be less than 5 volts.
- Enable to cut from 4 x 4 mm extremely small ESD label to a thick security label.
- It is easy to adjust the photo sensor for different types of label.
- Very compact design perfectly fits cell-system.
- Stainless body enabled to be used in ESD and clean room.
- Scrap winder can remove scrap automatically.

Specifications

Label Length	4 – 100mm
Width of Label Mount	4 – 75mm
Sending Speed	8.3 mm/sec. (min) 14mm/sec. (max)
Stop Error Margin	0.14mm(min) 0.314mm(max)
Size	192 x 170 x 253mm (W x H x D)
Weight	3.1kg

*Because of the motor's characteristics, the standstill point will differ if scrap builds up.
